

Does Coinbase work 24 hours 24 7 available?

Yes, the Coinbase platform itself is fully operational 24 hours a day, 7 days a week for buying, selling, and trading cryptocurrencies. The cryptocurrency market is global and never closes, so the platform is designed to match that continuous availability.

However, some associated services may not be available 24/7:

- **Bank Transfers (Fiat Currency):** Transferring traditional currency (like USD, EUR, etc.) to or from your bank account may be subject to your bank's operating hours and can cause processing delays, especially on weekends and holidays.
- **Customer Support:**
 - Automated support, the Help Center, and virtual assistants are available 24/7.
 - Live customer support agent availability (phone or chat) varies by region and account type. For example, in the US, UK, Ireland, and Canada, 24/7 phone support is available for urgent issues, such as a compromised account.
 - For general inquiries, live support may follow standard business hours in some regions.
 - Subscribers to the premium service, Coinbase One, have access to 24/7 priority phone support for all inquiries.

Maintenance: Occasionally, Coinbase may experience scheduled maintenance or technical issues that could temporarily affect access. These are usually announced in advance on the Coinbase status page.

Account Restrictions: For security purposes, actions like a new account recovery or changing your 2FA method might result in a temporary 24-hour hold on sending funds off the platform.
